

# 1121MK\* Precision Attenuators

\*Available in: 1dB, 2dB, 3dB, 6dB, 10dB & 20dB

The RMS 1121MK\* ***“Precision Attenuators”*** have been designed and manufactured to the highest standards. They are ideal for headends, labs or even cable drops where a broad range of dB values, is required for signal management. The standard values are \*1dB, 2dB, 3dB, 6dB, 10dB & 20dB

## Features:

- Bandwidth 5MHz to 1GHz
- RFI Shielding >-120dB
- Solid screw machined brass, silver plated body.
- Precision machined #22 gauge center pin
- Precision machined “F” ports that are SCTE compliant
- Positive Locking Action (PLA) of the male “F” guarantees 100% grounding and RFI integrity.
- PLA eliminates signal flashing due to vibration
- 360 degree center conductor contact seizure provides high holding force, and excellent wiping action.
- F61 designed to accept RG6 or RG59 cables
- Very flat attenuation & excellent return loss
- Light weight, compact size, easy to install
- Laminated label with dB value clearly marked
- Non power passing
- CE approved
