

RMS HPNA (*HomePNA 3.1*) Filter

UK technology company Segnet, winners of awards that have included the Queen's Award for Enterprise in Technical Innovation, approached RMS to develop the HPNA filter required when deploying the Segnet HPNA system (<http://en.wikipedia.org/wiki/HomePNA>)

The challenging specification was issued by Segnet and in less than 12 weeks, fully compliant hand-built RMS approval samples of the HPNA diplex filter were delivered.

Segnet are currently promoting the HPNA system in a number of markets and may be contacted via their website <http://www.segnet.co.uk/>
